

# Austin ISD iPads Empower Caregivers

District iPad restrictions help protect our youngest learners

Go to Settings > General > Device Management > JamfSchool MDM Management Profile > Restrictions

Austin ISD Internet filtering applies in web browsers.

## Apple's "Screen Time" gives caregivers more control

Screen Time settings **do not** show the more restrictive limits already in place through the District settings noted above. Screen Time settings that are less strict than general restrictions will not apply, even though the display may appear to have that option.

- ✓ Set time limits.
- ✓ Set additional limits on what children can see or do. These can only be more strict than the general restrictions set by the District.
- ✓ See data on how and when students are using the iPads.

## Caregivers can download optional apps using personal Apple IDs & passwords

- Caregivers should use secure passwords and should not share them with children.
- Downloading apps uses Internet data.
- Caregivers are responsible for any paid apps they download.

Teachers will be able to push additional apps to their classes.

*Coming in  
late  
September!*
