

LBJ EARLY COLLEGE HIGH SCHOOL 2017 AUSTIN ISD BOND PROGRAM MODERNIZATION

In November 2017, a majority of Austin voters—72 percent—passed Austin ISD’s 2017 bond proposal for \$1.05 billion to create modern learning spaces for all students. As part of the bond, LBJ will receive modernized learning spaces that benefit all students. Additionally, the Liberal Arts and Sciences Academy (LASA) transitioned out of the LBJ campus, which has freed up more space to grow programs and facilitate collaborative learning experiences.

Construction is currently underway to accommodate a larger student body and create modernized learning spaces at LBJ.

WHAT’S IN STORE FOR LBJ:

LBJ’s modernization is a part of a **broader Long-range Plan** to upgrade the entire facility over time through future bond packages. Phase one construction began in June 2021 and includes improvements to central spaces and the LBJ Medical High School program. Future phases would include improvements to outdoor spaces, classrooms, athletic and fine arts facilities.

In 2019, the LBJ Campus Architectural Team (CAT) was formed to give guidance to the project team as they designed the LBJ modernization. Each modernization in the 2017 Bond Program is designed to reflect specific community needs based on the district's Educational Specifications and the bond budget authorized by voters. The CAT includes LBJ teachers, staff, family members and community members.

PHASE ONE RENOVATIONS INCLUDE:

- A **two-story media center** at the core of the campus comprising the library, common areas and small group rooms.
- **Lecture halls for the Health Professions Program (P-Tech)**—a program that gives students opportunities to apply their skills in real-world situations.
- **Updated courtyard** and added street trees around the perimeter of the campus, funded by the Keep Austin Beautiful grant.
- A **community room** at the front of the campus.
- New **safety and security systems**.

WHY IT MATTERS:

Just like educators use technology to engage students, physical spaces are a tool that can be customized to support different teaching approaches and individual student preferences. The LBJ project gives students more opportunities to explore their interests and discover their talents in spaces designed by and for the LBJ community.

PHASE ONE KEY INFORMATION

Total Project Budget:

\$25,575,000

Anticipated Opening Date:

Summer 2022

Current Capacity:

902

Planned Capacity:

1,842

FCA Score (AISD average is 72)
