Education

Templeton Demographics was engaged to perform demographic research and enrollment projections. Our process involved researching five years of district enrollment data, geo-code student data, review of economic conditions, review of vacant land and housing research. With our more than 40 years combined experience, we built a very extensive geographic data base. The process creates a detailed analysis of where the students reside and where they attend school. These patterns, along with economic conditions and research from the housing market, form the basis for the enrollment projections we provide to more than 100 districts throughout the state of Texas.

DISTRICT OVERVIEW

Key Takeaways

- Austin Independent School District's 2023/24 student enrollment is 73,707 students, an enrollment increase of 228 students over 2022/23.
- Early Education enrollment jumped from 226 students in 2022/23 to 574 students in 2023/24 an increase of 348 students.
- Kindergarten enrollment appears to have stabilized 2023/24 with an enrollment of 5,249 KG students. A sharp departure from recent years, as the KG enrollment had declined by over 1,000 students since 2019/20 (Pre-COVID).
- AISD's elementary school population (with out of district students) is 35,475 students, an increase of 441 students (1.3%) over 2022/23.
- Total elementary school population is projected to decrease by 252 students in the next year and decline by roughly 2,019 students in the next 5 years.
- AISD's middle school population is currently 14,168 students, a decline of 305 students over last year (-2.1%).
- The district's middle school population is expected to decline by 165 middle school students in the next year, and increase by 342 students in the next 5 years.
- AISD's high school population is 20,655 students, an increase of 162 students over last year.
- The district's high school population is forecasted to decline by 137 students next year, and decrease by 1,729 students in the next 5 years.
- In 2024/25, AISD is projected to enroll 73,495 students, a decrease of 212 students (-0.3%) from the current year.
- In 5 years the district may see a population decline of 3,543 students and a projected enrollment of 70,759 students, a decline of 2,948 students.
- Students that reside outside of the AISD boundary, but transfer into the district slightly decreased between 2022/23 and 2023/24 at approximately 3,384.
- More than 19,500 apartment units and an additional 4,300 condo units are under construction across AISD, which will come online within the district in the next one to two years and are expected to yield minimal students.
- AISD added more than 8,200 multi-family units and 780 single family units in the last year, even as the district saw a decline in student yields because of the total enrollment decline.

Austin ISD Executive Summary

The Austin Independent School District experienced an enrollment increase of 228 students in 2023/24 resulting in an enrollment of 73,707 students. Impacts have been felt in AISD enrollment as life continues to return to pre-pandemic status. The largest enrollment increases from the 22/23 school year to this 23/24 school year were in Early Education, 3rd, and elementary school grades.

The unemployment rates in the Austin-Round Rock MSA have remained steady for the last twelve months. In December 2023, the unemployment rate for the MSA stood at 3.0%. From December of 2022 to December of 2023 over 26,300 jobs were added in the area, an increase of 2.6%. Austin's large diverse economy and educated workforce will continue to drive the economic recovery in 2024, especially as the MSA experiences a large increase in the tech industry.

The district's housing market is largely driven by high density infill and multi-family development. There have been roughly 780 traditional single family homes added in the 12 months leading into the end of the 3rd quarter (Oct. 22 – Sept. 23). In the last 12 months the highest until totals that came online were categorized as multi-family. This total includes, condominiums, apartments and for rent housing developments (where applicable). These new rental properties have shown to have very low student yields, often less than 2 students for every 10 units built. While traditional single family developments throughout the district may add 3-5 students for every 10 home builds. In the next 5 years the district is expected to add roughly 2,500 single family homes and over 24,000 multi-family units. Although the raw number of units described above would generally result in some enrollment gains, this is not likely the case in AISD, with the very low resulting student yields and negative retention cohorts at the secondary level (less than 1 to 1, year over year).

Enrollment declines in Austin ISD are expected to continue with the district projected to decline by 2121 students, for a 2024/25 enrollment of 73,495. Project growth cohorts at the lower levels are projected to see moderate increases as they return to pre-pandemic rates similar to 2019/20. However, the district will continue to decline in enrollment dropping by nearly 3,000 students over the next 5 years. This trend is expected to slow, but continue, in the latter part of this 10-year forecast period. AISD enrollment numbers reflect all students enrolled in the district summarized based on the campus they attend during the 2023/24 school year, regardless of where they might live. The student population projections include only students living within the Austin ISD district boundaries, based on the campus attendance zone of their physical address. In 2033/34 the enrollment of AISD is expected to be just over 69,000 students.

Charter School Tracking

- Within the AISD boundary there are 50 operating charter school campuses, including 5 campuses that opened in 2022/23
- These campuses enrolled more than 18,807 students in 2022/23, an increase of 257 students over 2021/22
- Within a 5 mile radius of Austin ISD, there are 78 campuses that enrolled more than 32,220 students in 2022/23. Two campuses opened in 2021/22 and thirteen opened in 2022/23.

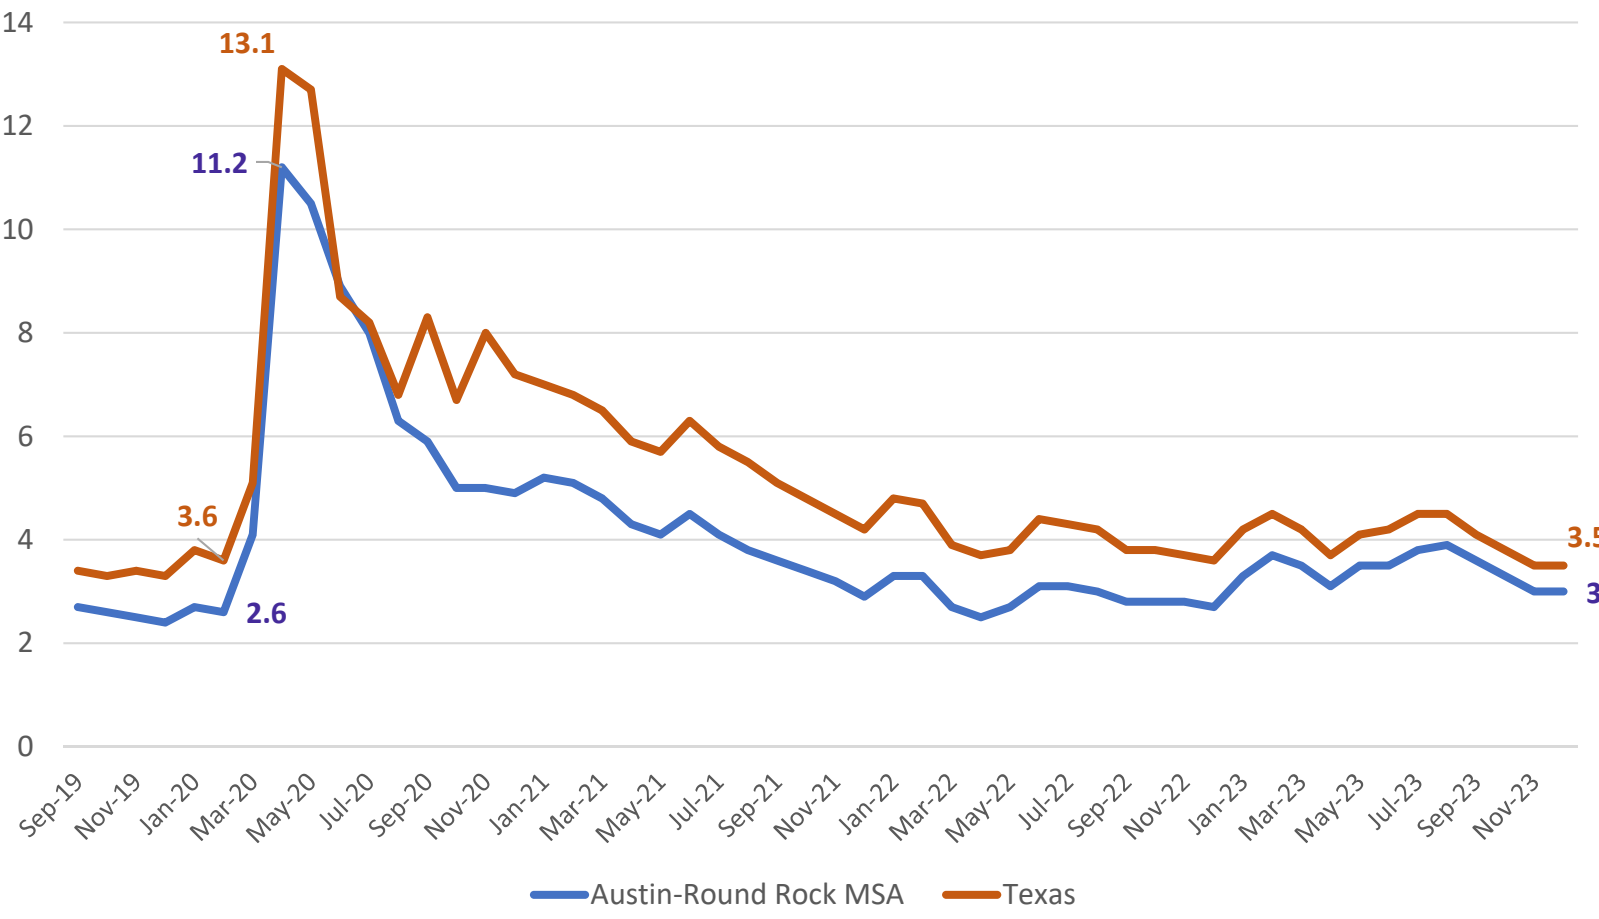

ECONOMIC OUTLOOK

Economic trends have continued to stabilize in 2023, including the strong economy at the start of the year. 2022/23 unemployment rates have remained steady and strong job growth continued within the Austin MSA. However, like the rest of the state and nation, Austin saw unemployment peak at nearly 12% in April of 2020 as lockdown restrictions, employment furloughs and layoffs went into effect. As lockdowns eased and company hiring resumed, unemployment rates have almost returned to pre-pandemic levels. The Austin MSA is in a unique position to prove its economic resilience with its educated and diverse workforce. This strength is proven, especially in the Tech industry, with the construction of Skybox & Prologis's Data Center in Pflugerville and Hutto and the development of ZT System's headquarters in Georgetown. The both of these expansions are expected to open in late 2024, bringing additional high paying skilled positions to the city.

Economic Snapshot (December 2023)

Unemployment Rate, Sept 2019 – Dec 2023

Unemployment Rate, Year Over Year

Skybox & Prologis Data Center

- Plans filed for construction on Skybox-Austin 2 in Pflugerville & Skybox-Hutto 1 in Hutto
- Investing \$63 million in 148,500 sq. ft. facility in Pflugerville & \$83 million in 253,730 sq. ft. facility in Hutto
- Construction anticipated to span Dec 2023 – Oct 2024 for Pflugerville development and Jan 2024 – Nov 2024 for Hutto development
- Hutto Skybox site is dubbed the “Power Campus”, offering 600 MW to the area
- Skybox Data Centers will bring hundreds of jobs to the area during construction & operation

ZT Systems

- Acquired 430,000 sq. ft. facility in Georgetown at I-35 & State Hwy 130
- The 146-acre facility will enhance the company’s production capabilities as a global leader in advanced server solutions for cloud computing and artificial intelligence
- Expected to be at full capacity late 2024
- Plans to hire up to 1,500 employees in high-tech jobs

HOUSING MARKET

As the housing climate remained slightly low during the 2021/22 time period, a slight downturn has continued during 2022/23. Within AISD, total new home starts and closings totals are down from 2022 partially due to condominium complexes being classified as multi-family developments. Due to increased occupant turnover and the fact that many condominium complexes had been double categorized as both single family and multi-family developments, condominium complexes are solely classified as multi-family units this year. New and existing home inventory have dropped below a stable level as home prices continue to rise to record setting levels. Within AISD, there were more than 750 new residential closings in the last 12 months through the 3rd quarter of 2023. However, those are mostly traditional single family homes, while over 8,200 multi-family units were completed in the last 12 months which yield significantly fewer students to AISD schools. More than 19,500 apartment units and an additional 4,300 condo units are under construction across AISD. While these complexes will cause an increase in new residential units in 2024 and 2025, they are not expected to yield a significant number of new students. However, multi-family yields were relatively maintained in 2023/24 whereas the single-family yield slightly decreased. This could be due to the increased amount of multi-family units being occupied by families priced out of single family homes. Apartment and condo units continue to yield below 1-2 students per 10 units constructed within AISD.

- Within AISD there were 138 new home starts and 95 new home closings in the 3rd quarter of 2023
- Total district new home activity has slowed since 2021 due to rising home interest and mortgage rates
- Difficulty obtaining construction materials continues to be an additional obstacle in the homebuilding process throughout the state

Historical Housing Yield by Housing Type

Methodology and Enrollment Projections

The Templeton Demographic’s projection methodology starts at the elementary level. We review the cohort patterns for each elementary zone and compare to housing trends. We create a housing forecast for each zone and apply similar yields (students per house) as we see in the surrounding area. Our team studies housing characteristics to assist in the future yield assumptions (Housing price, housing type, age of the housing and location will impact yields). We study the feeder pattern ratios and then advance the students (enrollment) up into the middle and high school grades. The Kindergarten projections are tracked and compared to the birth rate ratios to determine if adjustments need to be made to the Kindergarten projections. We will use High School cohort patterns to assist with the High School projections. We have three different “control” measures to check our projections.

With the impacts of the COVID-19 pandemic we expect this years patterns will be very different from previous patterns. We believe the district will likely see a surge in spring enrollment due to families gaining confidence as the COVID vaccine becomes available.

Population Analysis

POPULATION PROJECTIONS METHODOLOGY

Templeton Demographics uses a detailed methodology in building population projections. First step is to break the district down into small geographic sections called planning areas. These planning areas are usually established around subdivisions and multifamily areas but major roads and transportation access also play a role in their creation. Second step involves the calculation of housing student yields which are calculated from the school district's student data that is carefully geocoded into our mapping software for analysis. Third step involves the review of student history to establish cohort patterns or historical growth rates. Fourth step involves the study of the housing market to forecast new single and multifamily housing units being built within the planning areas established in step one. Fifth step involves review of existing housing to establish regeneration areas based upon the age of the homes. All of these factors are used to build the ten year population projections at the campus and grade level
